

Target Listening by Country

Harold Sellers, 3211 Centennial Dr., Suite 23, Vernon, BC V1T 2T8
E-mail: dixerharold@gmail.com

Target Listening provides a guide to where, when and how to hear all radio countries operating on the shortwave bands. Reports from our members and other references are used to compile tips that can assist you to log these countries.

Notes:

(1) The purpose of Target Listening is two-fold. One, to give you tips on how to hear the country in question. Second, to help you in your quest to hear as many countries as possible. Some targets are easy to hear, while others may be extremely difficult – and everything in between!

(2) Target Listening includes two sections. The first section is a by-time listing, which lists only time, country and frequencies. The countries listed here may be relay sites or the direct source of the broadcast. [Refer to the by-country listing for that country for complete details.]

The second section is a by-country list giving the best chances to hear the country, according to monitoring reports from club members or from other publications and sources. We give you the best chances to hear broadcasts direct from transmitters in the target country, but we also list relay transmissions if these may be well heard, so those interested in the programs from the country have the best opportunity to hear them.

(3) Relay broadcasters may be found under both the country where the studios are as well as where the relay transmitters are. In the first case, this is so you will know where to look for the transmissions of that country's broadcaster. In the latter case, the intent is to give you an easier (usually!) target to log the country serving as a relay.

(4) See the end of Target Listening for a list of references and contributors to this column (given in brackets throughout).

(5) The country names used in T.L. are taken from the NASWA Radio Country List, which we use in the ODXA. As a result you will find some countries from past history that are now politically part of an-

other country. The Country List is available on the North American Short Wave Association website, <http://www.naswa.net>.

Legend :

Times are in UTC, frequencies in kiloHertz

* sign-on or sign-off time

v variable frequency

<1800> heard before and after time within brackets; 1800> heard from this time; <1800 heard to this time

Abkhazia
